

Clean Energy Choice®

Support Renewable Energy and Earn Money for Your Community

The **Massachusetts Renewable Energy Trust** is helping to promote renewable energy technologies and foster the emergence of sustainable markets for power generated from renewable sources.

The Trust invites you to learn more about its efforts to promote renewable sources of energy and sign up to support clean energy in Massachusetts at www.CleanEnergyChoice.org.

Here, you will find:

- Answers to your questions about this program
- Information regarding renewable electricity offerings
- A list of items that communities can purchase with Trust matching grants

Clean Energy. Let's Make More!

You can contribute to a healthier electricity supply that comes from the sun, wind, and other renewable resources. Through Clean Energy Choice, a program of the Massachusetts Renewable Energy Trust, you have the power to:

- Reduce our reliance on polluting fossil fuels that contribute to global warming.
- Strengthen energy independence by supporting the development of renewable energy supplies to Massachusetts communities.
- Aid the growth of the clean energy economy in the Commonwealth.

Any Massachusetts household or organization can participate by choosing to pay a bit extra to support the development of clean electricity supplies.

Double Your Money with Trust Matching Funds

For every dollar you pay to a Clean Energy Choice supplier to support new renewable energy sources, the Trust will give two dollars:

- One dollar goes directly to your city or town to spend on renewable energy projects.
- One dollar goes to renewable energy and energy conservation projects that benefit the state's low-income residents.

In addition, your payments to support clean energy may be tax deductible from your federal income taxes depending on which supplier you choose.

You Get What You Pay For

Clean Energy Choice-qualified suppliers must meet our program's high consumer protection standards for information disclosure, reporting, and pricing. Clean Energy Choice regularly audits suppliers in order to provide assurance that your money goes to the purpose for which it was intended.

RENEWABLE ENERGY TRUST

Certified Suppliers

Below is a list of the suppliers that are certified by the Trust's Clean Energy Choice program. Households and small business customers can sign up by directly contacting a supplier in their utility coverage territory.

Utility:		 *Boston-metro area and South Shore residents	 *Cape and Vineyard residents	 Western Massachusetts Electric The Northeast Utilities System
